

## BIG COAL DEAL IS CONSUMMATED.

Republic Company Buys Martin Plant From Bessemer.

ABOUT \$600,000 IS INVOLVED.

## BIG COAL DEAL IN GREENE COUNTY.

J. V. Thompson Sells Emerald Coal Company 4,200 Acres.

COMPANY HAS 9,400 ACRES.

Company is Spreading Out Operations in Greene and Washington Counties. Also—Will Build Additional Ovens Making Large Plant.

By a deal closed yesterday afternoon the Republic Iron & Steel Company has purchased the Martin plant from the Bessemer company and will take over the operation at once. The coke plant has 450 acres of coal and 196 ovens and it is stated that the price paid was in the neighborhood of \$600,000. The two Griffin plants are not included in the deal but there is some reason to believe that the company may let go of the two plants.

It is now spreading out in its operations in Greene and Washington counties and as the company holds a very large acreage the it is said that the operations will be concentrated at one point. The Bessemer company recently purchased 1,900 acres in Washington county adjoining its present Mifflinboro plant. At present they are advertising for bids for the construction of 100 additional ovens at that point and in time as the coal can be developed thus will be out of the largest coke plants contemplated for that territory.

The Republic Iron & Steel company already owns an undeveloped tract of 500 acres of coal adjoining the Martin field which has never been developed because of the great cost of opening up the property. By acquiring possession of the Martin mine he suddenly gets rights of way for all necessary passages or coal, materials and supplies either above or under ground and will be able to develop its older properties through the Martin mines.

The coal in this tract was bought by J. V. Thompson, W. W. Williams and James R. Clegg in 1900 and lies in a field formed by the Nickelton tract, Peter H. Franks' tract, David Gads tract, two tracts of Samuel C. Fas, Francis M. Fas, tract, John Morris tract and Jacob Fas' tract. The price then paid was new on \$5,000 and \$5,000 per acre. In the years, or 1900, they transferred about 500 acres of this field to the Bessemer Coke Company receiving in the vein, laborious sum of \$4,000 per acre.

The Bessemer company then bought the surface of the Nickelton and Frank tracts for which it paid \$2,000 and erected the Martin plant of 196 ovens. It has been in operation since 1900 and has been a very productive plant.

## WESTMORELAND COKE OVENS TO BE FIRED.

General Resumption to Go Into Effect in Adjoining County at Once.

**GREENSBURG** Nov. 1.—The Mt Pleasant Coal Company forced to develop the coal underlying the St. Xavier's academy property at Beaver station just as the business depression came on, has announced that operations will begin Monday morning when 120 coke ovens will be built. One hundred and twenty-five men will be put to work and orders are on hand to insure three cars work.

The Fort Pitt Coal & Coke Company started its new plant at Fort Pittman six miles from Ligonier this week.

The J. C. Frick Coke Company has fired 200 of the 400 ovens at the Stand and Works No. 2 at Mt. Pleasant.

From other parts of Westmoreland county comes the news that sufficient coal and coke ovens have been secured to guarantee a straight run through the winter of almost every coke oven in the county if water could be secured with which to operate them.

The Brown Kettenbach works construction company received large orders recently and full sets of men are now employed with prospects of a two years run.

## DELEGATES ARE NAMED TO MINING CONGRESS.

Burgess Sonnen Appoints Rockwell Marquette and Clair Stillwagon to Pittsburgh Gathering.

George A. D. Sonnen-Sarrazin appointed Rockwell Marquette and Clair Stillwagon delegates to the American Mining Congress which meets in Pittsburgh December 1, 2 and 3. The official call for the meeting gives a warning the power to appoint delegates to the Congress where it is expected that thousands engaged in the coal and coke business will gather to discuss important topics.

Messrs. Marquette and Stillwagon have been engaged in efforts in the coal business practically. When it is over, and will represent the town of Conneautville from a standpoint of practical mining.

RAILROAD WEIGHTS TO GOVERN SETTLEMENTS.

## SECOND BRIGADE OF GUARD MAY ENCAMP NEAR SOMERSET NEXT.

**General Hulings and Staff Visit Site Near Town and Are Well Pleased With Location.**

SOMERSET Nov 19.—On Monday will likely be held at Somerset. All General Willis J. Hulings of Oil City the local people are in favor of the accompanied by a number of his staff officers. Every courtesy will be given to him and the members of his party. He will inspect several proposed sites for the 900 encampment of the Second Brigade of the National Guard of Pennsylvania. The Second Brigade encamped at Somerset two years in succession and apparently for brigade camp ground in 1906 the officers were highly pleased with the location but the general officers were the honor of the Second Brigade of the N. G. P. The Second Brigade of the N. G. P. is composed of the regiments of in front of Batter B and the Shell in Troop C cavalry competing in all annual outings subsequent to the Erie Gettysburg and other towns.

There were two sites just outside the borough limits of Somerset which seemed to meet with the approval of everyone who inspected them prior to the coming of General Hulings and his party. Both sides failed to meet with the approval of General Hulings however. His ground or objection was that both are too near Somerset. In this section of the State thousands of visitors will strengthen Somerset and the week of the encampment will be a g狂 time. At one of the previous encampments it was estimated that in one day 25,000 persons visited the camp ground.

The party was composed of the following: General Willis J. Hulings, Oil City; W. O. McNeary, Pittsburgh; J. M. Reynolds, Grove City; Charles J. Hendler, Philadelphia; W. H. Conroy, Oil City; W. A. Scott Jr., Pittsburg; Louis Klein and J. P. Taggart, used at the two previous encampments but the latter is favored to be favored as the camp ground for 1909.

This evening it was stated authoritatively that the next encampment will be to the selection of Somerset as a camp site.

## FAYETTE COUNTIAN TELLS OF PRICES.

## FAMOUS GENERAL BECAME RECLUSE.

**Seigle Bigam in Oklahoma Writes About Cost of Living.**

## DUCKS BRING 5 CENTS A POUND.

**Snows Difference Between Cost of Living in New Western State and at Home—Turkeys Over One Half Cheaper There Than Here.**

Seigle Bigam, formerly of Indian Creek but who two months ago left for Oklahoma under date of Octoer 23, writes an interesting letter to a friend in Connellsville. Mr. Bigam states that his health has not greatly improved since he went to the Far West but that he will remain in the territory until April when he expects to return to Fayette County. Mr. Bigam is stopping with the family of S. Shearer formerly of Mill Run. He is 14 miles from a railroad and four miles from a post office although a rural delivery route passes near his place. Although not a poet he says here is lots of rain and lots of game and that he is enjoying the latter to his heart's content.

It is interesting to note the prices quoted for food and articles in that part of America. Corn is selling at 17 cents per bushel, cotton \$2.00 per 100 pounds, wheat 9 cents per bushel, prairie hay 8¢ per ton, 100 to 120 lbs per bushel, apples \$1.00 per bushel, eggs 24 cents per dozen, sweet potatoes 70 cents per bushel.

But the most interesting of all prices, and those that will引起 the most interest, are those quoted on November 19, encamped on a trail in the hills of the Wilash river about 100 miles north of Fort Washington. Turkey poults of ten to 12 weeks old are quoted at 8 cents a pound. At the present time turkeys are being quoted in Connellsville at 20 and 22 cents per pound and as Thanksgiving Day draws nearer it is safe to say that flocks of turkeys will be soaring. Chickens can again be seen on a horse after they have been shot by hunters. The country of Olala where Mr. Bigam is now stopping at 6 cents a pound. Any good housewife would wish that she lived there and many a hungry husband would quickly sign up in the swaying on a Sunday dinner. But the quotation may be repeated to be certain. Where in Fayette county can ducks be purchased at 5 cents a pound? If any butcher has raised fair he has two ducks at that price there would be a sample to his shop.

Under the existing circumstances it would not be surprising to see Mr. Bigam return fat rosy and happy.

## BEER THIEF CAUGHT.

**Sam Lewis Entered Car of Booze Once Too Often.**

UNIONTOWN Nov 19.—Sam Lewis is a negro who has the habit of breaking into cellars of beer kegs and getting drunk. Yesterday morning he was sent to jail by Justice John Foye.

The officers have no clear reason for his conduct but it is known that he was caught in the act yesterday morning. He was sent to jail by Justice John Foye.

When You Want Anything advertise in our classified column. The cost is a word.

## JURORS DISCHARGED

Unsettled Cases to Go to Foot of Trial List.

UNIONTOWN Nov 19.—After binding instructions had been issued by the court a jury of the defendants in the cases of Lent Leonard administrator against John F. Conroy and Frank L. Springer and James M. Smith and J. S. Smith the juries for the first two cases in the Conroy case in the first named cases that still exist from the trial of the accused brother of B. Owsley.

Among the unsettled cases which go to the foot of the trial list are the following:

WILLIAM E. SMITH vs. JOHN F. CONROY, et al., in the case of the Conroy brothers.

JOHN F. CONROY vs. JOHN F. CONROY, et al., in the case of the Conroy brothers.

JOHN F. CONROY vs. JOHN F. CONROY, et al., in the case of the Conroy brothers.

## OLD RAILROADER

### IN LEGISLATURE.

Shadrach Murphy of Connellsville Now Oklahoma Legislator.

### HAS HAD A NOTABLE CAREER.

Tells of Incident While Railroading Over Mountains That Helped His Candidacy in Far Western Field Where He Has Lived Several Years

Max Clegg, railroad veteran

will be interested in his life story of Shadrach Murphy who became a county commissioner and state legislator in Oklahoma. Since leaving Connellsville Mr. Murphy has been in the Oklahoma legislature in his native state.

Mr. Murphy was born in Indiana

and came to the state in 1870

with his mother and father.

He attended school in Indiana

and then taught school in Indiana

and Ohio.

## TROLLEY LINES WILL CONNECT SOMERSET COUNTY TOWNS SOON.

Network of Tracks Will Soon Cover Section Giving Outlets in Several Directions to Residents.

SOMERSET Nov 1—Somerset \$ 600 five per cent bonds and \$ 700 county will within one year less be \$ 600 five per cent bonds covered with a network of trolley tracks which will connect all the large towns of the county. Construction will be made of the trolley line running to Johnstown, Connellsville and Cambria City, Md. The Pennsylvania & Maryland Railway Company is the owner of the 11-mile of way over which the interurban trolley service will be established. This concern was recently victorious in a protracted battle in the courts of equity in Somerset county. The Meyersdale & Schubert Street Railway Company, which was organized several years before the present traction company, claimed certain rights of way in Hill Jack and Summit townships. The present company also claimed this property and Judge W. Rush Gillis of the Franklin county bench decided the case in favor of the P. & M. company. This concern recently gave a mortgage to the Farmers Loan & Trust Company of New York for a million dollars this mortgage to secure an issue of

## PENNSY TO PUT ON ELECTRIC ENGINES.

New System to Be Installed Between Philadelphia and Jersey City.

EXTENDED TO PITTSBURG LATER.

Expected Improvement Will Revolutionize Methods of Railroading in Country—Car Make Better Time Than Steam.

Speeding now at 10 miles an hour Pennsy's new railroad trains drawn by Westinghouse electric engines will cut the distance between Newark, N. J., and Philadelphia in two and a half hours. The first electric train will be tested next month in the mountains and later extended to Pittsburgh. But long before that time Pittsburgh terminals will have been electrified and this will give the benefit of the revolution now beginning in railroad operation.

Such was the forecast just told in Philadelphia and Pittsburgh, but behind all there is a story of facts which convinces the doctoring that the Pennsylvania is preparing for the most wonderful change inaugurated since the first railroad was built.

The engineer professed by the Westinghouse company has been test in actual operation and his development of speed of 120 miles with little effort. A number of these engines have been built, and each one has met the requirements of the Pennsylvania company's engineers. Trials for others are stated as being prepared by the American Locomotive Company and the number required for the operation of the New York division can be completed and delivered in a short time. Just how long it will take to electrify the trains are traveling between Pittsburgh and New York has not been estimated, but that the plan will be carried out appears to be the opinion of those in close touch with the corporations directly interested.

In this connection it was advised that during the last visit of President James McClellan and other high officials of the Pennsylvania to Pittsburgh only a few weeks ago they all paid attention to plans of important changes in terminal arrangements here.

Several years ago Peter Westinghouse company first proved to its satisfaction that electrical engines were more economical than the use of steam engine in a test of a completed plant was made on the East Pittsburgh, and in the presence of some of the best railroad men in the country. The engine was made to do things which a powerful steam engine could not accomplish and there was general enthusiasm approval of the plan.

It is probable that some time will pass before the entire steam east of Pittsburgh is electrified, the plan now being to electrify the main line only. This will require an enormous expenditure but as the work will cover a number of years it is a fact that it can be done with comparative ease.

BURGLARS MAKE SECOND HAUL.

Visit Fairchance Store Again Last Night and Get \$70.

FIRKLAND Nov 1—Firkin this morning the store of Samuel Golder near the Penns River. It was broken into and a sum of \$ 70 worth of goods was taken. It failed to the store was gained by breaking the door.

This is the second time within the past three months this store has been burglarized. On the previous occasion Gordon lost about \$ 60 worth of goods which was never recovered.
